

GOAL already produces excellent client resources — a 30-day follow-up playbook and a CRM data-export hub. Neither lives on **checkoutgoal.com**; both sit on disconnected **vercel.app** URLs that build authority for a domain GOAL doesn't market. The main site is a brochure with **no content layer at all**. The redesign is the moment to launch a first-class Resources Hub on-domain — written so every title, card, and guide is found, trusted, and acted on. This brief is weighted toward **content and copy**: the words, the templates, the schema, and the roadmap.

01 Current-state audit

checkoutgoal.com · live review, June 2026

0

Resource pages on-domain

/resources, /guides, /blog all return 403

2

Strong guides, off-domain

Hosted on *.vercel.app, no link equity

43

Chars in homepage meta

Target is 150–160, and unique

0

Schema · OG · sitemap

No JSON-LD, social tags, or sitemap

5x

Conversion lift claimed

The proof content can demonstrate

4

Static brochure pages

Demo-focused; no educational content

Scorecard

DIMENSION	STATUS	FINDING
Content / resources footprint	CRITICAL GAP	No <code>/resources</code> , <code>/guides</code> , <code>/blog</code> , or <code>/learn</code> (all 403). Zero indexable educational content.
Existing guides on-domain	OFF-DOMAIN	Follow-up playbook and export hub live on <code>*.vercel.app</code> — no link equity or brand authority.
Meta description	THIN / DUP	Homepage description is the H1 repeated (~43 chars). Should be 150–160, unique, benefit-led.
Title tag	ACCEPTABLE	Reasonable length and keyword; has a stray leading space and odd "Your own" casing.
Open Graph / Twitter	MISSING	No social tags. Shared links render with no preview — a problem for guides meant to be shared.
Structured data	MISSING	No JSON-LD. No Organization, SoftwareApplication, FAQPage, or HowTo — all of which the content fits.
robots.txt & sitemap	MISSING	Both return AccessDenied (S3 403). No crawl directives, no sitemap for discovery.
Canonical tags	ABSENT	Low risk today; needed once a content library with filters/pagination exists.
Core conversion path	WORKING	Clear value prop, demo CTA, SOC2/TCPA signals, "old way vs. GOAL way" frame. Build on this.
Mobile / viewport	OK	Responsive viewport meta present; <code>html lang="en"</code> set. Baseline hygiene is fine.

HEADLINE FINDING

The most valuable SEO move available to GOAL is not fixing a tag — it is publishing the content that doesn't exist yet, on the domain that currently has none. Every other item above becomes a checklist applied to the new Resources pages as they're built.

02 The strategic case

Why a resources section, and why now

The "stranded authority" problem

GOAL's best content currently builds equity for throwaway domains instead of the brand. The redesign is the one-time opportunity to bring it home, where it compounds.

TODAY

Authority leaks off-domain

checkoutgoal.com – brochure only

— no link —

goal-followup-best-practices.vercel.app

lead-export-guides.vercel.app

Guides rank (if at all) for a domain GOAL doesn't market. No internal links, no shared analytics, no path to a demo.

AFTER REDESIGN

Authority compounds on-brand

checkoutgoal.com/resources/

↳ links up & down

/resources/playbooks/30-day-lead-follow-up

/resources/guides/export-lead-data

Every guide strengthens the domain that ranks for "insurance leads," cross-links to money pages, carries a demo CTA.

Why content fits GOAL's buyer

- **The buyer is mid-task, not mid-funnel.** Agency owners search for fixes — "my internet leads don't answer," "how do I export bind data to AgencyZoom." GOAL's product is the answer; the content demonstrates it.
- **Trust is the whole sale.** A market burned by shared-lead aggregators responds to a library that openly teaches follow-up discipline and clean data hygiene — "partner," not "vendor." It reinforces the existing "old way vs. the GOAL way" narrative.
- **AI assistants are the new top of funnel.** Owners ask ChatGPT, Perplexity, and Google AI overviews these operational questions. Structured, schema-marked guides are how GOAL becomes the cited source.
- **Resources reduce churn.** Clients who follow the cadence and export data cleanly convert more and stay. Content is a retention investment with a marketing dividend.

GOAL doesn't need to invent a content strategy. It needs to stop hiding the one it already has.

03 Information architecture

A shallow, scannable hub-and-spoke

URL & page structure

```
checkoutgoal.com/resources/ # Resources Hub – the landing/index |—
/resources/playbooks/ # strategy & best practices | |— .../30-day-lead-follow-up # ←
migrate existing guide | |— .../speed-to-lead | |— .../aged-lead-revival |—
/resources/guides/ # CRM & data how-tos | |— .../export-lead-data # ← migrate existing
hub | |— .../export/agencyzoom | |— .../export/ricochet | |— .../export/lead-manager |—
/resources/verticals/ # by line of business | |— .../auto-insurance-leads | |— .../home-
insurance-leads | |— .../medicare-leads |— /resources/product/ # using GOAL (help/docs) |
|— .../quotefunnel-setup | |— .../reading-your-reports |— /resources/glossary/ #
definitions – long-tail + AI citations |— .../[term]
```

IA PRINCIPLES

1. Keep it two clicks deep — hub → guide. **2.** URLs describe content, not format. **3.** Never change a published URL; 301-redirect if it moves. **4.** Every guide links up to its category/hub and across to 2–3 siblings + one money page.

Hub page anatomy

1. **Hero** — headline + one-line promise + optional search.
2. **Featured / start-here** — the follow-up playbook, given pride of place.
3. **Category sections** — Playbooks · Guides · By Line of Business · Using GOAL, each a card grid (reuse the proven export-hub card pattern).
4. **"Don't see what you need?"** request hook (proven engagement device from the export hub).
5. **Demo CTA band** — consistent conversion path at the bottom of every resource page.

The **GOAL Guides Hub** design reference (Claude Design) is intended as the visual spec for this hub page. Reading and implementing it is gated on connector authorization — see §07.

04 Content & copy playbook

The words, written to be found and trusted

4.1 — Resources Hub copy (paste-ready)

/RESOURCES/ — HERO & INTRO

H1

Run a better insurance agency, lead by lead.

SUB / PROMISE

Playbooks, CRM guides, and benchmarks from the GOAL team — the same tactics our highest-performing agencies use to turn exclusive leads into bound policies.

FEATURED EYEBROW

START HERE

FEATURED CARD

The 30-Day Lead Follow-Up Playbook — The 60+ touch cadence that lifts bind rates 3–5× the industry median. Steal the scripts.

REQUEST HOOK

Don't see what you need? Tell us the guide, CRM, or topic you're after and we'll build it. → request a guide

CLOSING CTA

Generate your own exclusive leads. See GOAL in action → Book a demo

4.2 — The guide-card formula

Reuse the export hub's scannable card pattern across every category. Five fixed slots — never free-form.

CARD = BADGE · TITLE · TYPE · ONE-LINE VALUE · ACTION

BADGE

2–3 letter monogram or LOB tag (**AZ** , **RC** , **LM** ; or AUTO / HOME). Proven in the export hub.

TITLE

The thing, named plainly — "Export GOAL leads from AgencyZoom."

TYPE TAG

PLAYBOOK · GUIDE · BENCHMARK · CHECKLIST · GLOSSARY

VALUE LINE

One sentence on the payoff or time cost — "Pull quote & bind data in under 2 minutes."

ACTION

Open guide → (consistent verb on every card)

4.3 — Title, meta & H1 templates by guide type

Targets: **title ≤ 60 chars**, **meta 150–160 chars**, exactly one **H1**. Lead with the searcher's words, then the GOAL brand.

TYPE	TITLE-TAG PATTERN	META-DESCRIPTION PATTERN
Playbook	[Outcome] in [timeframe]: The [Topic] Playbook GOAL	Verb-led, benefit + proof + light CTA. "Follow the exact 30-day cadence our top agencies use to bind 3–5× more internet leads. Scripts and checklists included — free from GOAL."
CRM / data	How to Export [Data] from [CRM] GOAL Guides	Task + speed + reassurance. "Step-by-step: export your GOAL quote & bind data from AgencyZoom in under 2 minutes. Screenshots for every step, no developer needed."
Vertical	[Line] Insurance Leads: A Guide for Agencies GOAL	Audience + promise. "What actually works for converting auto insurance leads — pricing, speed-to-contact, and follow-up tuned to how auto shoppers behave. From the GOAL team."
Glossary	What Is [Term]? Definition & Examples GOAL	Definition-first for AI/snippets. "[Term] explained in plain English for insurance agencies, with an example and how it affects your lead ROI."

Worked example — migrating the existing follow-up guide

/RESOURCES/PLAYBOOKS/30-DAY-LEAD-FOLLOW-UP	
TITLE	Insurance Lead Follow-Up: The 30-Day Playbook GOAL (54 chars)
META	Most insurance leads convert between day 12 and 30 — if you keep showing up. Steal GOAL's 60+ touch cadence, call scripts, and daily checklist to bind 3–5× more. (156 chars)
H1	The 30-Day Lead Follow-Up Playbook
QUERIES	how to follow up on insurance leads · internet insurance lead follow up · insurance lead cadence

Worked example — a CRM export guide

TITLE

How to Export GOAL Leads from AgencyZoom | GOAL Guides (53 chars)

META

Export your GOAL quote and bind data from AgencyZoom in under two minutes. A clear, screenshot-by-screenshot walkthrough — no spreadsheet gymnastics, no developer needed. (159 chars)

H1

Export your GOAL lead data from AgencyZoom

QUERIES

agencyzoom export leads · download lead data agencyzoom · agencyzoom quote bind report

4.4 — Structured data (schema) per page type

HOWTO — FOR CRM / DATA GUIDES

JSON-LD · <head>

```
// drop into export/CRM guide templates; fill steps programmatically
{
  "@context": "https://schema.org",
  "@type": "HowTo",
  "name": "How to export GOAL leads from AgencyZoom",
  "totalTime": "PT2M",
  "step": [
    { "@type": "HowToStep", "name": "Open Reports",
      "text": "In AgencyZoom, go to Reports > Lead Source." },
    { "@type": "HowToStep", "name": "Filter to GOAL",
      "text": "Set the lead source filter to GOAL and your date range." },
    { "@type": "HowToStep", "name": "Export to CSV",
      "text": "Click Export and download the quote & bind columns." }
  ],
  "publisher": { "@type": "Organization", "name": "GOAL",
    "url": "https://checkoutgoal.com" }
}
```

```
{
  "@context": "https://schema.org",
  "@type": "Article",
  "headline": "The 30-Day Lead Follow-Up Playbook",
  "author": { "@type": "Organization", "name": "GOAL" },
  "publisher": { "@type": "Organization", "name": "GOAL",
    "logo": { "@type": "ImageObject",
      "url": "https://checkoutgoal.com/logo.png" } }
}
// pair with an FAQPage block built from the guide's real questions:
{ "@type": "FAQPage", "mainEntity": [
  { "@type": "Question",
    "name": "How many times should I call a new insurance lead?",
    "acceptedAnswer": { "@type": "Answer",
      "text": "21+ attempts in week one; 60+ touches across 30 days." } }
] }
```

Site-wide: one **Organization** block and a **SoftwareApplication** block on the homepage, plus a **BreadcrumbList** on every resource page (Resources → Category → Guide).

4.5 — Internal linking plan

DIRECTION	FROM → TO	ANCHOR-TEXT GUIDANCE
Up	Guide → category → /resources/	Exact category name — "Playbooks", "CRM & Data Guides".
Across	Guide → 2–3 sibling guides	Descriptive, varied — "speed-to-lead matters most in the first 5 minutes", not "click here".
To money page	Guide → demo / product / pricing	Contextual, benefit-led — "GOAL delivers exclusive leads you can actually reach". One primary, not five.
From money pages	Homepage / how-it-works → /resources/	Add a "Resources" nav item + a "Learn" section. Signals depth to users and crawlers.

RULE OF THUMB

3–6 contextual internal links per guide, at least one to a conversion page. Keep total links per page well under 100. Diversify anchor text — repeating the same exact-match anchor everywhere reads as manipulation.

4.6 — AI / answer-engine visibility (GEO)

- **Answer in the first 1–2 sentences.** Lead each section with the direct answer, then elaborate. Models lift self-contained, near-the-top statements.
- **Use real numbers and name them.** "Contacted within 5 minutes → 21× more likely to qualify" is quotable; "respond quickly" is not.
- **Structure for parsing.** Clear H2/H3 questions, short paragraphs, ordered steps, FAQ blocks. The playbook's 01–11 structure is already ideal.
- **Mark it up.** HowTo, FAQPage, and Article schema (§4.4) make content machine-readable.
- **Build entity authority.** Consistent Organization schema + a glossary defining GOAL's terms helps engines cite GOAL by name.

4.7 — Voice & copy standards

DO	DON'T
Lead with the agency's problem, in their words.	Open with GOAL's product or company history.
Be directive and specific — "call 21+ times in week one."	Hedge — "you may want to consider following up."
Back claims with numbers and name the source.	Make vibes-based promises ("convert way more!").
Give something usable for free (scripts, checklists, CSV).	Gate the useful part behind a demo form.
Earn the CTA at the end, once value is delivered.	Interrupt the guide with sales pitches.
Plain English; define jargon (link the glossary).	Acronym soup (RPC, bind rate) with no definition.

05

Content inventory & roadmap

What to publish, and in what order

GUIDE	CATEGORY	STAGE	PRIMARY QUERY	PRIORITY
30-Day Lead Follow-Up Playbook EXISTS	Playbooks	Mid	how to follow up on insurance leads	P1 MIGRATE
Export Lead Data hub + AgencyZoom / Ricochet / Lead Manager EXISTS	Guides	Client	agencyzoom export leads	P1 MIGRATE
Speed-to-Lead: the 5-Minute Rule	Playbooks	Mid	speed to lead insurance	P1
Why Exclusive Leads Beat Shared Leads	Playbooks	Top	exclusive vs shared insurance leads	P1
Auto Insurance Leads: Agency Guide	Verticals	Top	auto insurance leads for agents	P2
Medicare Leads: Agency Guide	Verticals	Top	medicare insurance leads	P2
Home Insurance Leads: Agency Guide	Verticals	Top	home insurance leads for agents	P2
Aged-Lead Revival Playbook	Playbooks	Mid	how to work aged insurance leads	P2
QuoteFunnel Setup & Best Practices	Product	Client	insurance landing page best practices	P2
Reading Your GOAL Reports / Attribution	Product	Client	lead source attribution insurance	P2
TCPA & Compliant Lead Contact (counsel-reviewed)	Playbooks	Mid	tcpa compliance insurance leads	P3
Glossary: bind rate, contact rate, RPC, in-market...	Glossary	Top	what is bind rate insurance	P3
More CRM export guides (Salesforce, HubSpot, Close...)	Guides	Client	[crm] export insurance leads	P3 DEMAND-LED

P1 = migrate what exists + the two highest-intent net-new playbooks (fast wins, proven format). **P2** = vertical + product guides that broaden reach and serve onboarding. **P3** = depth and long-tail. The "request a guide" hook (§4.1) becomes the demand signal that orders the P3 backlog — let client requests, not guesswork, set it.

06 Implementation plan & KPIs

Four phases, each shippable on its own

0

WITH THE REDESIGN BUILD

Foundations — make the domain content-ready

Add `/resources/` to the IA and nav. Ship the missing technical baseline — robots.txt, an auto-generated XML sitemap, canonical tags, OG/Twitter defaults. Build reusable **Hub**, **Guide**, and **Card** templates wired with the §04 title/meta/H1, schema, and breadcrumb patterns. Implement the GOAL Guides Hub design reference as the hub template (pending auth — §07).

1

WEEKS 1-2 POST-FOUNDATION

Migrate & launch — bring existing guides home + 2 quick wins

Move the follow-up playbook and export hub onto `checkoutgoal.com/resources/`; 301-redirect the old vercel.app URLs. Rewrite titles/metatas to the §04 templates; add schema. Publish the two P1 net-new playbooks. Cross-link all four; add the demo CTA band; submit the sitemap.

2

WEEKS 3-8

Expand — broaden reach with verticals & product guides

Publish the P2 set (Auto / Home / Medicare; QuoteFunnel + Reports). Stand up the request hook and log requests as the demand backlog. Link verticals to the relevant homepage offerings and to the follow-up playbook.

3

ONGOING

Scale & compound — depth, long-tail, a publishing rhythm

Build the glossary; publish demand-led CRM guides and the counsel-reviewed compliance guide. Set a cadence (e.g., 2 guides/month) and a quarterly refresh of stats and screenshots. Promote top guides through account managers and onboarding.

How we'll know it's working

KPI	WHAT IT TELLS US	CADENCE
Indexed resource pages	Crawlability & library growth (from ~0 today)	Monthly
Organic sessions to /resources/	Acquisition from non-branded search	Monthly
Resource → demo CTA rate	Whether content actually feeds pipeline	Monthly
Keyword rankings (target queries)	Authority gain on operational terms	Monthly
AI-answer citations / mentions	Answer-engine visibility (GEO)	Quarterly
Guide requests received	Demand signal that sets the P3 backlog	Ongoing
Guide engagement vs. bind rate	The retention / success dividend	Quarterly

07 Design handoff & SEO checklist

The one pending item, and the standard for every new page

ACTION NEEDED FROM YOU

The brief specifies implementing the **GOAL Guides Hub.html** design from Claude Design (project `d5cfa570-...`) as the visual spec for the Resources hub. Reading and implementing it requires the Claude Design connector, which currently needs authorization. **Please run `/design-login`** (grants `user:design:read/write`). Once authorized, I'll read `GOAL Guides Hub.html` , map it to the Hub/Guide/Card templates above, and produce the implemented hub — the one item still pending.

Technical SEO checklist — apply to every new resource page

ELEMENT	STANDARD
Title tag	Unique, ≤ 60 chars, searcher-term first, " GOAL" suffix. No leading whitespace (current homepage has one).
Meta description	Unique, 150–160 chars, benefit + proof + soft CTA. Never duplicate the H1 (current homepage mistake).
H1	Exactly one per page; matches search intent; no empty headings; logical H2/H3 nesting.
Open Graph + Twitter	<code>og:title/description/image/url/type</code> + <code>twitter:card=summary_large_image</code> . Each guide gets a branded share image.
Canonical	Self-referencing on every page; one canonical per filtered/paginated view.
Structured data	HowTo (guides), Article+FAQ (playbooks/verticals), BreadcrumbList (all), Organization + SoftwareApplication (site-wide).
robots.txt & sitemap	Add both (absent today). Auto-include new resource URLs; reference the sitemap in robots.txt.
Images	Descriptive alt text; modern formats (WebP/AVIF); explicit width/height; lazy-load below the fold.
Internal links	3–6 contextual links/guide, ≥1 to a conversion page; varied anchors; breadcrumb up to hub.
Performance	Static or server-rendered; minimal client JS on content pages; fast LCP. (Existing guides already do this well.)
Mobile / a11y	≥16px body text, ≥44px touch targets, sufficient contrast, keyboard-navigable.
